Attorney Docket No.: 40.0050  
First Inventor: Bertrand du Castel  
Title: A System and Method for Filtering Content

TOPPER™ DESIGNATOR

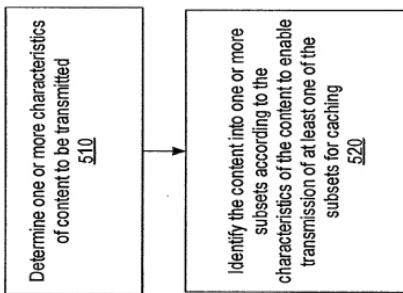

FIG. 5

Determine a plurality of characteristics of content, including at least one static characteristic of content

611

Share the determination of the plurality of characteristics of content with a gateway and the one or more clients, the sharing to enable the gateway to filter content for transmission to the one or more clients based on the plurality of characteristics and the static characteristic of content thereby reducing an amount of content transmitted between the gateway and the one or more clients

621

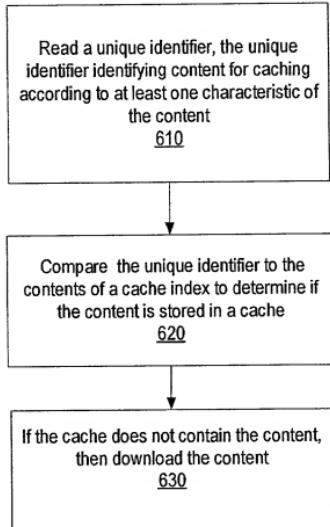

(Optional) Insert unique identifiers into the filtered content

625

Update the gateway with a later determination of the plurality of characteristics of content, the updating including adding data to a container associated with the gateway
